DIRECTIONS FOR USE

Apply only as directed during the growing season.

Use Contec DG® Dispersing Granule Technology 12-24-8 where a high phosphorus fertilization is desired or when iron and manganese are needed to help correct or prevent deficiencies during the growing season.

For turf:

Watering in this product will disperse each granule into thousands of particles. This will facilitate the movement of the nutrients into the soil.

Application to wet, close-cut golf turf may result in foliar staining, which will discolor the turf to a brown/black appearance.

Phosphate Notice: This lawn/turf fertilizer contains phosphorus and is only for nonagricultural use on (i) turf during its first growing season, (ii) on turf areas being repaired or renovated, and (iii) on turf where a soil test performed within the last 3 years indicates a phosphorus deficiency.

Application Rates:

- LOW: 3.13 lbs/1,000 sq. ft.
MEDIUM: 4.20 lbs/1,000 sq. ft.
HIGH: 5.21 lbs/1,000 sq. ft.
