WATER CONDITIONING AGENT / DRIFT REDUCTION AGENT / DEPOSITION AID / ANTIFOAMING AGENT

GENERAL INFORMATION

Cornbelt® Protector™ is a highly active, dry tank mix adjuvant designed to enhance post emergence herbicides that require the use of ammonium sulfate. AMS reduces hard-water mineral antagonism prevalent in most water sources that interfere with the performance of certain herbicides.

Cornbelt® Protector™ can be used with glyphosate, glufosinate, Enlist One®, Enlist Duo® and other herbicides.

Cornbelt® Protector™ contains drift reducing polymers that suppress driftable spray fines and improve deposition onto plant surfaces.

The antifoam agent in Cornbelt® Protector™ minimizes the formation of troublesome foam.

Cornbelt® Protector™ has been finely milled to enhance rapid solubility.
