

GENERAL INFORMATION

EMERGEN™ L is a water-soluble fertilizer composition for foliar & in-furrow applications containing potash & other nutrients. EMERGEN™ L is designed to promote plant growth & quality.

COMMERCIAL USE ONLY

EMERGEN™ L is water-soluble & compatible with common nutrients & pesticides. For mixing, slowly add the amount of EMERGEN™ L directly into a partially filled spray tank with agitation operating. Do not apply EMERGEN™ L if rainfall is likely within 3 hours after application. The typical use of EMERGEN™ L in agriculture is a single application in-furrow followed by 1 to 3 foliar applications.

WARNING: EMERGEN™ L contains molybdenum (Mo).

The application of fertilizing materials containing molybdenum (Mo) may result in forage crops containing levels of molybdenum (Mo) which are toxic to ruminant animals. Information regarding the contents & levels of metals in this product is available on the internet at http://www.aapfcco.org/metals.html

To the extent permitted by applicable law, the seller makes no warranty, expressed or implied, of merchantability, fitness or otherwise concerning use of this product. The user assumes all risks of use, storage or handling that are not in accordance with the accompanying directions.

Information about the components of this lot of fertilizer may be obtained by writing to & giving the lot number which is found printed on the front of this iug.

DIRECTIONS FOR USE

Foliar application 10 fl oz/acre

Apply at 8 - 20 gallons of water solution/

Make first foliar application at 2-3 leaf stage or as directed in the specific crop directions below. Please note that the first application at early stage is always the most important one. Repeat foliar application twice at about 2 week (14 day) intervals.

For foliar use on the following crops: • Capola

- Cereals (Wheat (apply at Feekes 3 to Feekes 10.5), Barley, Rye, Rice, Buckwheat, Grain Amaranth, Milo, Oat, Millets, Triticale, etc.)
- Corn: Field, Sweet, Popcorn, Silage, Seed (apply at V5-VT/RI)
- Seed (apply at V5-VT/R1)

 Cotton
- Legumes (soybeans (apply at R1-R3), Peas, Beans etc. including those grown for seed or oil production)
- Oil Seed Crops (Rapeseed, Castor, Flax, Jojoba, Safflower, Sesame, Sunflower, etc.) Beans etc. including those grown for seed or oil production)
- Peanut
- Sorghum
- Sugarcane
 Sunflower
- Switchgrass, Miscanthus
- Potato (up to three applications: first when the height of plant is 4 – 5 inches (10-12 cm), second at the beginning of flowering, third after flowering)
- Forage, Fodder & Straw of Cereal Grains:
- Corn, Wheat, & any other cereal grain crop
 Grass Forage, Fodder, & Hay: Bermuda
 Grass, Bluegrass, Bromegrass, Fescue,
 Pasture & range grasses, grown for hay
 or silage, Sudan grass, Timothy, & other
 grass forage, fodder, & hay
- Non-Grass Animal Feed: Álfalfa, Clover, Kudzu, Lespedeza, Lupin, Sainfoin, Trefoil, Vetch, & other non-grass animal feed

Soil application: In-Furrow or 2 x 2 5-10 fl. oz/acre

Apply at 3 - 5 gallons of water solution/

Optional: 2-3 days after planting as a narrow band over-row.

For soil use on the following crops:

- Corn: Field, Sweet, Popcorn, Silage, Seed
- Potato (pre-emergence)

Compatibility with liquid fertilizers must be confirmed prior to application. Emergen L may not mix satisfactorily with high phosphorus & high sulfur content products.
