GENERAL INFORMATION

Gravity S Micro Surge is a 100% soluble fertilizer designed to provide an enhanced color, greening response in turf and ornamentals. **Gravity S Micro Surge** is specifically formulated to be rapidly absorbed through leaf tissue to provide a rapid response. EDTA Iron extends the length of plant greening.

A number of variables influence the rate of application necessary to prevent or correct a specific deficiency. For best results, follow good agronomic practices and conduct soil, resin or tissue test using WinField United's NutriTech Tool. Additional fertility may need to be supplied from other sources. For specific recommendations for your plants, consult your state's recommendations or your local plant expert.

Information regarding the contents and levels of metals in this product is available on the internet at:
<http://www.aapfco.org/metals.htm>

DIRECTIONS FOR USE READ ENTIRE LABEL BEFORE USING

Gravity S Micro Surge can be tank mixed. If you are unfamiliar with the product, a jar test should be used to confirm compatibility and a small area should be treated with the product prior to large scale application. **Gravity S Micro Surge** should not be mixed with strong acids as product degradation will occur and the fertilizer will precipitate.

For Turfgrass Applications: Do not apply near water, storm drains, or drainage ditches. Do not apply if heavy rain is expected. Apply this product only to your lawn/garden, and sweep any product that lands on the driveway, sidewalk, or street, back onto your lawn/garden.

GOLF COURSES

Gravity S Micro Surge should be applied at 2 to 4 lbs per acre. every 21 to 31 days as needed during the growing season. Spray volumes can range from 1 to 4 gallons per 1,000 sq. ft. for adequate coverage. **Gravity S Micro Surge** may be used on greens, tees, fairways, roughs, and other turf areas composed of turfgrasses including, but not limited to: Bluegrass, Perennial Ryegrass, Tall Fescue, Annual Bluegrass, Bentgrass, Bahiagrass, St. Augustinegrass, Zoysiagrass, Centipedegrass, Seashore Paspalum, and Bermudagrass. For best results do not irrigate or mow until sprayed area has completely dried.

LAWNS AND OTHER TURF AREAS

Gravity S Micro Surge should be applied at 2 to 5 lbs per acre every 21 to 31 days as needed during the growing season. Spray volumes can range from 0.5 to 4 gallons per 1,000 sq. ft. for adequate coverage. **Gravity S Micro Surge** may be used on all turfgrasses including but not limited to: Bluegrass, Perennial Ryegrass, Tall Fescue, Annual Bluegrass, Fine Fescue, Bentgrass, Bahiagrass, St. Augustinegrass, Zoysiagrass, Centipedegrass, Seashore Paspalum, and Bermudagrass. For best results do not irrigate or mow until sprayed area has completely dried.

TREES AND ORNAMENTALS

Gravity S Micro Surge should be applied at 1 to 5 lbs per acre of landscaped area every 21 to 31 days as needed during the growing season. For container grown products, trees or other ornamentals apply a foliar spray or soil drench at a rate of 5 to 25 lbs. per 100 gals of water. In a drench, use a minimum of 5 gallons of carrier. Prior testing is required before applying to open flowers.

MIXING INSTRUCTIONS

Agitation will aid in getting the product to go into solution. If carrier water is cold, user may need to pre-mix the soluble fertilizer with warmer water in a separate container prior to adding it into the sprayer.

Spray coverage and drift control:

To optimize spray coverage or deposition, and to reduce drift, include Droplex® adjuvant.
