

Greenfill Start™

30-0-0

GUARANTEED ANALYSIS

Total Nitrogen (N) 30.00%
12.00% Urea Nitrogen
18.00% Other Water Soluble Nitrogen*

Derived from Triazone, Methylene Urea and Urea.

*18.00% Slowly available nitrogen from triazone and methylene urea.

Contains 3.15 pounds of nitrogen per gallon.

F3445

GENERAL INFORMATION:

Greenfill Start™ is designed primarily for foliar applications to prevent or correct nitrogen deficiencies in a wide range of agronomic plants. This product should be used as part of a comprehensive system for optimizing soil/nutrient conditions for plant growth, development, yield and quality.

DIRECTIONS FOR USE

Greenfill Start may be applied as a foliar spray by air, ground concentrate or dilute. Maintain agitation to provide uniform distribution within spray tank. Use of a high quality adjuvant at recommended rates to improve spray coverage is usually advised.

Do not apply when plants are under excessive heat or moisture stress. Applications of foliar nutrients to leafy vegetables or soft-skinned fruit during periods of excessive temperatures may cause cosmetic injury. Applications of certain nutrients to fleshy fruit within 30 days of harvest may result in staining of rind or skin.

It is advised that this product be diluted with water at no less than 2 parts water to 1 part Greenfill Start. This product can be soil applied as a band, side-dress or injected through the irrigation system, sprinkler, drip or center pivot.

Consult your local agronomist for rates specific to your crop and conditions.

Do not apply near water, storm drains, or drainage ditches, or to any impervious surface. Do not apply if heavy rain is expected. Apply this product only to the intended application site.

FIELD AND ROW CROPS: Apply 0.5-5 gallons per acre.

VEGETABLE CROPS: Apply 1-5 gallons per acre.

DECIDUOUS FRUIT AND NUT CROPS (Excluding Apples and Pears): Apply 1-10 gallons per acre.

APPLES AND PEARS: Not for use in-season on bearing orchards. Post harvest and non-bearing orchards, use 1-10 gallons per acre.

VINES AND BERRIES: Apply 0.5-10 gallons per acre.

COMPATIBILITY: Greenfill Start is compatible with many co-applied nutrient sources as well as crop protection chemicals. Always jar test new combinations for compatibility prior to field mixing. Care should be taken not to blend this product with highly acidic materials.

SPECIAL CONSIDERATIONS: This product has an alkaline pH and may raise spray solution pH. When tank mixed with materials sensitive to alkaline hydrolysis, the use of a buffer or acidifier at recommended rates is advised. Add buffer or acidifier prior to adding this product. Reducing spray solution pH below 5.0-5.5 may result in precipitation.

PRECAUTIONARY STATEMENTS

KEEP OUT OF REACH OF CHILDREN

Based on currently available data, this product is not classified as a GHS hazardous substance. However, observe good industrial hygiene practices. Wash hands after handling. Refer to the Safety Data Sheet if first aid instructions are needed.

STORAGE AND DISPOSAL: Do not contaminate water, food or feed by storage, disposal or cleaning of equipment. Store in original container only and keep tightly sealed when not in use. Store away from incompatible materials. Dispose of contents/container in accordance with federal, state and local regulations.
