

# HERBICIDE BOOSTER<sub>BIO</sub>

Herbicide Booster BIO is formulated to enhance defoliants and other herbicide applications. The specialized surfactant spreads the treatment while the enzyme complex helps complete plant chemical intake. It also works well as a buffer to lower pH, which enhances most spray solutions effectiveness.

**Application Rate:** Shake well before use. Always conduct a compatibility test prior to mixing any chemicals. Apply at the rate of 12 to 32 fluid ounces per 100 gallons of spray solution. Do not add at a level that would exceed 1% of the finished spray volume. Do not use with Glean or Harmony.

**Guaranteed Analysis:**

Proprietary Blend of Enzyme Complexers.....	10.00%
Nitrogen (N).....	5.00%
5% Nitrate Nitrogen	
Sulfur (S).....	7.00%
Proprietary Blend of Polyoxyethelene Fatty acid esters. .	37.00%
Inert Ingredients.....	41.00%
