

IRON LAIDEN®

0 - 0 - 1

Guaranteed analysis:

Soluble Potash (K₂O)1.0%
Iron (Fe)3.0%
3% Chelated Iron

Derived from: Iron HBED and potassium hydroxide.

STORE ABOVE 40°F

KEEP OUT OF REACH OF CHILDREN

WARNING

May cause an allergic skin reaction. Wear protective gloves/protective clothing/eye protection/face protection.

PRECAUTIONARY STATEMENTS

READ LABEL PRIOR TO USE. Wear protective gloves/protective clothing/eye protection/face protection

FIRST AID

IF ON SKIN: Wash with plenty of water. If skin irritation or rash occurs: Get medical advice/attention. Take off immediately all contaminated clothing.

In case of medical emergency, call toll free 1-877-424-7452

GENERAL INFORMATION

Iron Laiden is an Iron HBED product designed for in-furrow application at planting to help alleviate iron deficiency chlorosis severity in soybeans and other plants.

DIRECTIONS FOR USE

Apply concentrated **Iron Laiden** at a rate of 0.5 – 1 gallon/acre. **Iron Laiden** must be dissolved in water prior to application. Dissolve 1 gallon of **Iron Laiden** per 12 gallons of water (minimum water temperature 50°F) and stir for at least 5 minutes.

Continue stirring if the product is not completely dissolved. The product solubility will depend on water temperature and water quality. Warm water will increase the solubility and reduce the time of dissolution. In case of cold water, you should allow extra time for complete dissolution of the product.

Compatibility: Compatible with other fertilizers. The pH of the tank solution should be above 4. A jar test should be used to verify compatibility.

Information regarding the contents and levels of metals in this product is available on the internet at:
