

- Trisodium citrate dehydrate, alkyl polyglucoside, monocarbamide dihydrogen sulfate, tallow amine ethoxylate 37.7%
- Other ingredients..... 62.3%
- Total 100%

PRINCIPAL FUNCTIONING AGENTS

- **Unsurpassed water conditioner.**
- **Industry leading surfactant proven across millions of acres.**
- **Convenient and easy-to-use application rate.**

Jackhammer® Elite will help to alleviate antagonism from hard water impurities such as iron, calcium, magnesium and other impurities in the spray solution.

Jackhammer Elite contains tallow amine, the industry's most effective surfactant to improve the biological activity of glyphosate and other herbicides. Proven across millions of acres to increase herbicide uptake and maximize effectiveness of your application.

Jackhammer Elite can be used with a wide range of pesticide spray mixtures when accompanying labels recommend water conditioners and spreader-wetter adjuvants.

Jackhammer Elite does not contain ammonium sulfate or acidify the spray solution and is compatible with a wide array of herbicides including those that contain glyphosate, dicamba, 2,4-D and many others.

Soybeans

Dry Beans

Sugarbeets

Wheat

Barley
