GENERAL INFORMATION

Kovar Condition CS is a non-ammonium sulfate water conditioning adjuvant with a built-in nonionic surfactant and humectant. By working in unison, the proprietary surfactant in Kovar Condition CS decreases the water droplet tension to increase the leaf surface area contact with the herbicide and takes full advantage of the unique water conditioning agent to ensure top performance of the herbicide even when used with hard water.

Kovar Condition CS is an ideal adjuvant choice to use with weak acid herbicides such as 2,4-D formulations, dicamba, glyphosate and paraquat. Kovar Condition CS is approved for use with many traired herbicide technologies. Always check with the herbicide manufacturers website for the most current approvals.

This product is not approved for aquatic use.

DIRECTIONS FOR USE

Kovar Condition CS is registered to be used at a rate of 32–128 oz. per 100 gallons of spray mixture. Higher rates may be necessary with hard water sources. **Do not use this product at rates in excess of 5% of the finished spray volume.**

Review both the adjuvant and herbicide label before use. Recommendations and restrictions on the pesticide label take precedence over any recommendations presented on this label. Kovar Condition CS may be applied by ground, air or other spray equipment that is listed on the herbicide label.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage and disposal.

STORAGE: Store away fro incompatible materials.

PRODUCT DISPOSAL: Dispose of waste in accordance with local authority requirements.

CONTAINER HANDLING: Dispose of container in accordance with all government regulations. Triple rinse (or equivalent), then offer for recycling, if available, or reconditioning, if appropriate. Alternatively, puncture and dispose of the container in a sanitary landfill or other procedures approved by state and local authorities. The ACRC (Agricultural Container Recycling Council) operates a national recycling program. To contact your state or local ACRC recycler, visit the ACRC web page at www.acrcycle.org
