GENERAL INFORMATION

LINK® NRANGE™ 26-0-0 is designed primarily for foliar applications to prevent or correct nutrient deficiencies in turf. This product should be used as part of a comprehensive Total Nutrition System® for optimizing soil/nutrient conditions for plant growth, development and quality. Proper application rates should be determined by specific conditions and plant requirements.

LINK products are formulated specifically for the professional market including greenhouse, field and container-grown nursery, sports turf, golf, and landscape managers. For professional use only on residential lawns.

DIRECTIONS FOR USE

When applying LINK NRANGE 26-0-0, maintain agitation to provide uniform distribution within spray tank. If a spreader is desired or recommended in the mix, use a high quality CPDA approved spreader at recommended rates to improve spray coverage.

Do not apply when plants are under excessive heat or moisture stress. The application rates listed below are only guidelines to be used in the development of your nutrient management plan. Test this product before use under your local growing conditions, application methods and desired rates. Adjust irrigation volume and frequency to maintain appropriate soluble salt levels.
