SHAKE WELL BEFORE USING**

**READ THE ENTIRE LABEL FIRST.
OBSERVE ALL PRECAUTIONS AND
FOLLOW DIRECTIONS CAREFULLY.**

Gordon's® Liquid Lawn & Pasture 20-0-0 is a general purpose fertilizer solution containing nitrogen sources and micronutrients, which are essential elements for vigorous plant and root growth. These micronutrients – zinc, copper and manganese – provide additional plant vitality. Use to maintain and improve turfgrass color, growth and density during the growing season or as a booster to enhance green color. Perfect for all 12-Volt and tow-behind sprayers.

Getting Started

Where To Use:

For use in all types of Lawns and Pastures.

For Lawn and Pasture Applications:

Refer to the table below for dilution instructions.

	To make 6 gal of finished spray	To make 12 gal of finished spray	To make 15 gal of finished spray
Amount of product to add to tank	1 gal	2 gal	2.5 gal
Amount of water to add to tank	5 gal	10 gal	12.5 gal
Coverage Area	6,000 sq.ft.	12,000 sq.ft.	15,000 sq.ft.

One gallon of product contains 2 lbs. Nitrogen.

When To Use:

For cool season grasses, the following guide may be used for the application schedule:

Number of Applications	When to Apply
2	March-April and early September
3	March-April, late August-September, and September-October
4	March-April, May, late August-September, and October-November

For warm season grasses, the nitrogen requirements are more variable than for cool season grasses. Gordon's Liquid Lawn & Pasture Fertilizer may be applied from early spring until September every 4-6 weeks to supply nitrogen depending upon the specific grass. The following guide may be used for the application schedule:

Number of Applications	When to Apply
2	April-May and September-October
3	April-May, June-July and September-October
4	April through September-October with a 4 to 6 week interval

How To Use:

Mixing instructions:

- Step 1: Add 1/2 - 2/3 of the required amount of water to the sprayer.
- Step 2: Add Gordon's Liquid Lawn & Pasture Fertilizer mixing solution thoroughly.
- Step 3: Slowly add in herbicide with agitation. (Skip if not adding herbicide).
- Step 4: Add balance of water with agitation.
- Step 5: Apply spray solution uniformly.

When tank mixing with herbicides, follow directions on the herbicide label. Always make sure that you use a jar test for compatibility before mixing chemicals in your tank.

Mixes easily with these Gordon's weed killers:

Trimec® Lawn Weed Killer · PASTURE PRO® Herbicide · Tankables Trimec® Weed Killer · AMINE 400™ 2,4-D Weed Killer · LV 400 2,4-D Weed Killer Solvent Free

Determining the Size of the Area to be Treated – Estimate the length and width of the area to be treated in feet. Multiply the length of the area by its width to determine the total square footage to be treated. Deduct any areas that will not be treated (house, shed, driveway etc.) and refer to the appropriate mixing chart for the use desired.

State Restrictions:

Apply only to actively growing turf. Do not apply near water, storm drains, or drainage ditches. Do not apply if heavy rain is expected. Apply this product only to your lawn/garden.

Gordon's Liquid Lawn & Pasture 20-0-0 is a component of a fertilizer program based on soil test recommendations. Use this product in conjunction with an additional fertilization program to provide at least 1 pound of nitrogen per 1,000 square feet each growing season. Check with your local Cooperative Extension Agency to obtain specific information on local turf best management practices. Check with your county or city government to determine if there are local regulations for fertilizer use.
