Product benefits:

Attracts bees & directs them to this pheromone spray on foliage.
 Attracts additional pollinators.
 Attracts bees from other pollinator sources.
 Placates bees from exterior disruptors & can prevent field bees from pollinating other areas.

Directions for use:

- ① Slowly mix contents with 650 litres of water.
- ② Add flower mix to this Pollination Booster.
- ③ Pick 350-500gms of flowers & heat with hot water for 5 minutes, and remove mulch.
- ④ In sunny conditions, spray directly onto foliage when flowers start to bloom.
