GENERAL INFORMATION

Foliar fertilization is intended as a supplement to a regular fertilization program and will not, by itself, provide all the nutrients normally required by crops or other intended plants. **RAZE™ 0-3-2** is a liquid fertilizer formulated to provide the plant with phosphorus and potassium. Optimum levels of these nutrients provide the opportunity for vigorous plant growth and fruit and grain development.

DIRECTIONS FOR USE

SHAKE CONTAINER WELL. Add **RAZE 0-3-2** to a partially filled spray-tank by pouring through a sieve or strainer. Wash any residual **RAZE 0-3-2** through sieve or strainer with remaining water. All other spray materials should be added prior to **RAZE 0-3-2**. **RAZE 0-3-2** may be applied at low concentrations for conventional ground foliar applications (10-50 gallons of water per acre) or at high concentrations for ground foliar low volume or aerial applications (2-5 gallons of water per acre).

In the case of very alkaline water (pH 7.5-8.0), it is strongly recommended to use an acidifying or buffering agent to lower the pH of the mixture down to pH 6.5-7.0.

CROP RATE RECOMMENDATIONS

FIELD CROPS	RATE/ACRE	APPLICATION TIMING
CEREAL CROPS: Spring and Winter Wheat	8 fl oz	Single application from 3 Leaf Stage (Herbicide Timing) thru Flag Leaf.
CORN: Grain, Silage, Pop, Sweet, and Seed	8 fl oz	Single applications from V3 to V8 growth stage (Herbicide Timing)

COMPATIBILITY

RAZE 0-3-2 is compatible with most pesticides, provided they are used in accordance with the registered label directions. Some compatibility problems may occur with alkaline mixtures (lime sulfur) and with spreader stickers containing ethanol. When there is a question of compatibility prior to charging the spray-tank, use the "jar compatibility test" in the following manner: Add 30 fl oz (20 parts) water to a glass jar with at least one quart capacity, then add 1.5 fl oz (1/3 part) of the products to be tank-mixed. Shake well and allow to stand for at least 5 minutes. Observe to determine if any flocculation, precipitation, or unusual settling out occurs. If flocculation, precipitation, or other incompatible properties, etc. occur, do not tank-mix **RAZE 0-3-2** with this product. Select another product with suitable compatibility properties.

Warranty and Disclaimer Statement

The directions for use of this product are believed to be adequate and must be followed carefully. However, it is impossible to eliminate all risks associated with the use of this product. Such risks may arise from weather conditions, soil factors, off-target movement, unconventional farming techniques, the presence of other materials, the manner of use or application, or other unknown factors, all of which are beyond the control of Arysta LifeScience North America, LLC ("Arysta"), and can cause crop injury, injury to non-target crops or plants, ineffectiveness of the product, or other unintended consequences. All such risks shall be assumed by the user or buyer.

Arysta warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes stated in the Directions for Use, subject to the inherent risks described above, when used in accordance with the Directions for Use under normal conditions. This warranty does not extend to the use of this product contrary to label instructions or under conditions not reasonably foreseeable to Arysta, and is subject to the inherent risks described above.
