

Use With Herbicides, Where Ammonium Sulfate Is Recommended

SHOCK will enhance the herbicide activity of certain post-emergence herbicides when used at the proper rate. When used at the recommended rates, **SHOCK** can enhance the efficiency of herbicide performance.

The added herbicide performance by the use of **SHOCK** may be more apparent in situations of environmental stress.

SHOCK can reduce surface tension to a staggering 25 dyne/cm. (Water is 72 dynes/cm.)

Use **SHOCK** at the rate specified by herbicide label.

CAUTION: CAUSES EYE IRRITATION

Notice: Seller warrants that the product conforms to its chemical description and is reasonably fit for the purpose stated on the label when used in accordance with directions under normal conditions of use, but neither this warranty nor any other warranty of merchantability or fitness for a particular purpose, express or implied, extends to the use, storage or handling of this product contrary to label instructions, or under abnormal conditions, or under conditions not reasonably foreseeable to seller, and buyer assumes the risk of any such use. The risks include, but are not limited to damage to plants, crops and animals to which the material is applied, failure to control pests, damage caused by drift to other plants or crops, and personal injury.

Principle Functioning Agents:
Ethoxylated Alcohol, Glycerol, Phosphoric Acids.
TOTAL Principle Functioning Agents.....90%
Constituents ineffective as a spray adjuvant.....10%

Exempt from tolerance under EPA 40 CFR 180.1001 (c).

DIRECTIONS FOR USE:

Use 1 Gallon of SHOCK per 10000 gallons of water.

Mixing Instructions:

1. Add half the amount of water to the spray tanks and begin agitation.
2. Add required amount of SHOCK before adding the herbicide to the spray tank.
3. Add the remaining water while continuing to agitate.

Always follow pesticide manufacturers' recommendations.
