Trio

Ammonium Sulphate

Herbicide Adjuvant

ACTIVE CONSTITUENT: 980 g/kg AMMONIUM SULPHATE

To be used with glyphosate-based herbicides to minimise antagonism when tank mixed with flowable herbicides and to improve performance under adverse environmental conditions

IMPORTANT: READ THE ATTACHED LEAFLET BEFORE USE

Contents: 25 kg

CTS Chemicals Pty Ltd. ABN 22 605 759 644
Manning Buildings, 135 High Street Mall
Fremantle WA 6160 Australia

STORAGE AND DISPOSAL

Store in the closed, original container in a cool, well-ventilated area out of direct sunlight. Triple-rinse containers before disposal. Add rinsings to spray tank. Do not dispose of undiluted chemicals on site.

If recycling, replace cap and return clean containers to recycler or designated collection point.

If not recycling, break, crush, or puncture and deliver empty packaging to an approved waste management facility. If an approved waste management facility is not available, bury the empty packaging 500 mm below the surface in a disposal pit specifically marked and set up for this purpose, clear of waterways, desirable vegetation and tree roots, in compliance with relevant local, state or territory government regulations. Do not burn empty containers or product.

SAFETY DIRECTIONS

Avoid contact with eyes and skin.

FIRST AID INSTRUCTIONS

If poisoning occurs, contact a doctor or Poisons Information Centre. Phone Australia 13 11 26, New Zealand 0800 764 766.

SAFETY DATA SHEET

Additional information is listed in the Safety Data Sheet that can be obtained from the supplier.

CONDITIONS OF SALE

CTS Chemicals Pty. Ltd. makes no warranty or guarantee and will not accept any responsibilities whatsoever and howsoever arising and whether for consequential, special or indirect loss or otherwise in connection with the supply, storage or use of these goods other than responsibility for the merchantable quality of the goods and such responsibilities mandatory imposed by Statutes applicable to the sale or supply of these goods. Always read the product labels on the container for all instructions, recommendations, critical comments and conditions of sale.

DIRECTIONS FOR USE

SITUATION	RATE	CRITICAL COMMENTS
Minimise antagonism to tank mixes with flowable herbicides	800 g/100 L of spray solution	Half fill the spray tank with clean water and start agitation.
Improve performance under adverse environmental conditions		Add Trio Ammonium Sulphate Herbicide Adjuvant to spray tank; ensure complete dissolution before adding herbicide. With agitation still running, add the required amount of flowable herbicide to the tank and mix thoroughly. Add the required amount of glyphosate-based product and the remaining water; mix thoroughly. Add surfactant, if required, near the end of the filling process to minimise foaming. Always maintain adequate agitation during application and use tank mix promptly.

NOT TO USED FOR ANY PURPOSE, OR IN ANY MANNER, CONTRARY TO THIS LABEL UNLESS AUTHORISED UNDER APPROPRIATE LEGISLATION

GENERAL INSTRUCTIONS

TRIO AMMONIUM SULPHATE HERBICIDE ADJUVANT should only be used with non-selective herbicides are use with some selective herbicides may result in loss of selectivity and therefore crop damage. Ammonium sulphate may be corrosive to metal parts of the sprayer. Thoroughly flush tanks, pumps and nozzles with water after use.

TRIO AMMONIUM SULPHATE HERBICIDE ADJUVANT is a completely soluble product. However in circumstances of high humidity this product may “cake” when exposed to the air. Potential problems may include handling problems after the product is opened, storage problems, and problems with dissolution or blockage of spray nozzles in boom sprayer/ equipment. To reduce the potential for caking, any opened, unused product should be immediately closed to limit exposure to the air. In the event that the product has caked, ensure the product is fully dissolved before spraying to avoid the potential for nozzle blockage. Dissolving the product through the top screen of the spray tank and ensuring the product is completely dissolved before spraying commences will eliminate the potential for nozzle blockage due to caked material.

PROTECTIONS

DO NOT contaminate streams, rivers or watercourses with the chemical or used containers.

STORAGE AND DISPOSAL

Store in the closed, original container in a dry, cool, well-ventilated area out of direct sunlight. Single-rinse or shake remainder into spray tank. Do not dispose of undiluted chemicals on site. Puncture and deliver empty packaging to an approved waste management facility. If an approved waste management facility is not available, bury the empty packaging 500 mm below the surface in a

disposal pit specifically marked and set up for this purpose, clear of waterways, desirable vegetation and tree roots, in compliance with relevant local, state or territory government regulations. Do not burn empty containers or product.

SAFETY DIRECTIONS

Avoid contact with eyes and skin. Do not inhale dust or spray mist. When preparing spray and using the prepared spray, wear cotton overalls buttoned to the neck and wrist (or equivalent clothing), a washable hat, and elbow-length PVC gloves. If using a hand directed sprayer, wear in addition: waterproof trousers and boots. After use and before eating drinking or smoking, wash hands, arms and face thoroughly with soap and water. After each day's use, wash gloves and contaminated clothing.

FIRST AID INSTRUCTIONS

If poisoning occurs, contact a doctor or Poisons Information Centre. Phone Australia 13 11 26, New Zealand 0800 764 766.
