

Willowood 700

PENETRANT • ACIDIFIER • DEPOSITION AID • DRIFT CONTROL AGENT

PRINCIPAL FUNCTIONING AGENTS:

Phosphatidylcholine, methylacetic acid and alkyl polyoxyethylene ether.....	80%
Constituents Ineffective as Spray Adjuvant.....	20%
TOTAL	100%

KEEP OUT OF REACH OF CHILDREN

DANGER/PELIGRO

Si usted no entiende la etiqueta, busque a alguien para que se la explique a usted en detalle.
(If you do not understand the label, find someone to explain it to you in detail.)

Hazard and Precautionary Statements: Causes serious eye damage. Causes severe skin burns. Harmful if inhaled. Avoid breathing dust/fume/gas/mist/vapor/spray. Wash Hands thoroughly after handling. Use only outdoors or in a well ventilated area. Avoid release to the environment.
Environmental Precautions: Prevent further leakage or spillage if safe to do so. Do not contaminate water. Do not allow to enter drains, sewers, or watercourses.

Personal Protective Equipment: Wear protective gloves, protective clothing / eye protection.

First Aid: **If in eyes:** Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice. **If on skin:** Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice. **If swallowed:** Call a poison control center or doctor immediately for treatment advice. Have the person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person. **If inhaled:** Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control center or doctor for further treatment advice.

Note to Physician: Probable mucosal damage may contraindicate the use of gastric lavage.
FOR A MEDICAL EMERGENCY INVOLVING THIS PRODUCT CALL: 800-424-9300
Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

GENERAL: Willowood 700 is a non-ionic, low foaming penetrant. Willowood 700 may be used to enhance the activity and effectiveness of agricultural and industrial chemicals. Willowood 700 provides more uniform coverage of spray solutions and aids in penetration. Willowood 700 may be used to acidify (lower pH) of spray solutions thus preventing alkaline hydrolysis of pesticides sensitive to high pH. Willowood 700 improves deposition and retards drift by producing a more uniform spray pattern. The degree of drift hazard varies with the type of pesticide and application conditions. Willowood 700 will help control, but not eliminate, drift. Willowood 700 is compatible with most pesticide formulations including water-soluble, flowable and wettable powders. For tank mix compatibility concerns, conduct a jar test of the proposed mixture to ensure compatibility of all components. Mix components in the same ratio as the proposed tank mix. Application may be by ground or air.

DIRECTIONS FOR USE: Willowood 700 may be used on a wide variety of crops including fruits, vegetables, wetlands, tree nut crops, citrus, small grains, forage crops, vine crops, turf or in non-crop sites, aquatic (including croplands, forestry (site preparation and release), industrial (storage areas, plant sites, and other similar areas including governmental and private lands), grasslands (including pastures, rangeland and fence rows), rights-of-way (utility, railroad and roadsides), turf (golf courses, parks, and sod farms), and ornamentals (container, field or greenhouse). The pesticide manufacturer's label should be consulted regarding specific adjuvant use recommendations and that rate should be used. Do not exceed 5% by volume of finished spray mix unless specified on the pesticide label.

Acidifying Agent: Highly alkaline water (pH 8 or higher) 8 to 16 ounces per 100 gallons of spray mixture. Mildly alkaline/acid water (pH 6.5 to 8) 4 to 8 ounces per 100 gallons of spray mixture.

NOTE: Willowood 700 is an acidifier and may be physically or chemically incompatible with alkaline spray materials.

Not for Aquatic Use

General Use: Herbicides (terrestrial), Defoliants, Desiccants: 1 to 4 pints per 100 gallons of spray mixture when used as a penetrant. 12 ounces to 2 pints per acre when used in place of crop oil concentrates. Insecticides, Fungicides, Acaricides, Plant Growth Regulators, Folar Nutrients: ½ to 2 pints per 100 gallons of spray mixture. Drift Reduction: 1 to 2 quarts per 100 gallons of spray mixture.

Non Crop Sites: 1 to 8 pints per 100 gallons (1 to 6 fluid ounces per 5 gallons) of spray mixture.

Turf and Ornamentals: 1 to 4 pints per 100 gallons (1 to 3 fluid ounces per 5 gallons) of spray mixture. Not all ornamentals have been tested. Test small representative sample plot before wide scale application is made.

STORAGE AND DISPOSAL

STORAGE: Store in a cool well-ventilated place. Keep in original container tightly closed. Do not reuse empty container. Do not store with food, feed, or other material to be used or consumed by humans or animals. Do not contaminate water supplies. For optimal storage, store between 40° and 90° F. If frozen, warm product before use.

DISPOSAL: Do not contaminate water, food or feed by storage or disposal. Dispose of contents/container on-site or at an approved waste disposal facility. Triple rinse (or equivalent) adding rinse water to spray tank. Offer container for recycling or dispose of container in sanitary landfill, or by other procedures approved by appropriate authorities. Recycling decontaminated containers is the best option of container disposal. The Agricultural Container Recycling Council (ACRC) operates the national recycling program. To contact your state and local ACRC recycler visit the ACRC web page at www.acrcycle.org.

WARRANTY

Generic Crop Science LLC warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes stated on the label when used in strict accordance with the directions, subject to the inherent risks set forth below. Generic Crop Science LLC MAKES NO OTHER EXPRESS OR IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR ANY OTHER EXPRESS OR IMPLIED WARRANTY.

Inherent Risks of Use: It is impossible to eliminate all risks associated with use of this product. Plant injury, lack of performance, or other unintended consequences may result because of such factors as use of the product contrary to label instructions (including conditions noted on the label, such as unfavorable temperature, soil conditions, etc.), abnormal conditions (such as excessive rainfall, drought, tornadoes, hurricanes), presence of other materials, the manner of application, or other factors, all of which are beyond the control of Generic Crop Science LLC or the seller. All such risks are and shall be assumed by buyer.

Limitation of Remedies: The exclusive remedy for losses or damages resulting from this product (including claims based on contract, negligence, strict liability, or other legal theories), shall be limited to, at Generic Crop Science LLC's election, one of the following: 1. Refund of purchase price paid by buyer or user for product bought, or 2. Replacement of amount of product used. Generic Crop Science LLC shall not be liable for losses or damages resulting from handling or use of this product unless Generic Crop Science LLC is promptly notified of such loss or damage in writing. In no case shall Generic Crop Science LLC be liable for consequential or incidental damages or losses.

The terms of the "Warranty Disclaimer" above and this "Limitation of Remedies" cannot be varied by any written or verbal statements or agreements. No employee or sales agent of Generic Crop Science LLC or the seller is authorized to vary or exceed the terms of the "Warranty Disclaimer" or this "Limitation of Remedies" in any manner.
